

Assignment 4 DD2424

Alexandra Hotti

June 13, 2019

1 Introduction

This report contains the results from an assignment where an RNN was used to synthesize the English text: *Harry Potter and the Goblet of Fire* by J.K. Rowling. AdaGrad was used for optimization.

2 Relative Error between Analytical and Numerical Gradients

This section contains the relative computations between the numerical and learned analytical gradients computed for the weights and biases. The analytical gradients were computed using the function: *ComputeGradsNum*. The relative errors were computed using Equation 1.

$$\frac{|g_a - g_n|}{\max(\epsilon, |g_a| + |g_n|)} \quad (1)$$

The relative errors were computed for two different parameter settings which can be found in table 1. The relative errors were deemed small enough and thus the gradient computations were deemed bug-free.

Table 1: Relative Errors between the Numerical and Analytical Gradients.

sig	Gradient of Loss wrt	m	sequence length	Max Relative Error
0.01	W	100	25	3.905125071965659e-05
0.01	V	100	25	6.928398165812726e-06
0.01	U	100	25	5.046385895936246e-04
0.01	b	100	25	5.015511739543174e-08
0.01	c	100	25	1.147407741596735e-09
0.01	W	5	25	1.717284071232338e-06
0.01	V	5	25	1.333180045891511e-06

0.01	b	5	25	3.658258677055384e-09
0.01	c	5	25	1.154795885937421e-09

3 Smooth Loss

Here the smooth loss plot over 2 epochs of training can be found. A sequence length of 25 was used and the size of the hidden states were set to: $m = 100$ and a learning rate of $\eta = 0.1$ was used.

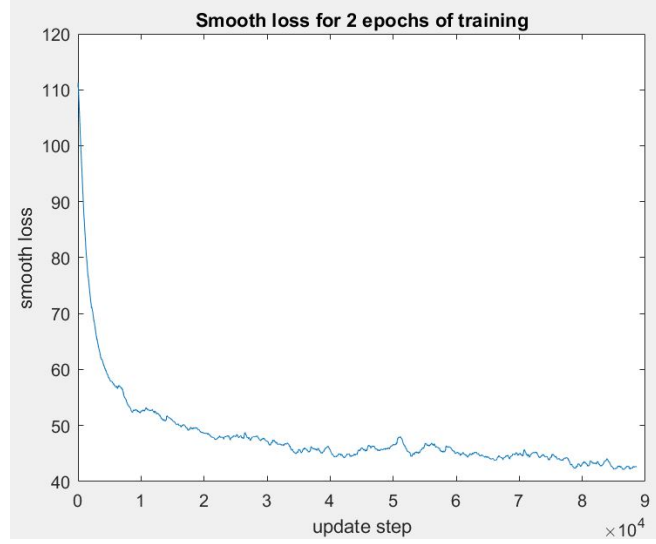

Figure 1: The smooth loss for an RNN over 2 epochs of training.

4 Evolution of text synthesise

Below 200 characters of synthesized text were generated after every 10 000 th update step up until the 100 000 th update step.

5 Synthesized text from best model

The model that achieved the lowest loss was finally used to synthesize 1000 characters of text. These results can be found below. The smooth loss at this point was: 38.1743 . The generated text is not readable, however it thus contain many accurately spelled words and names of characters from the book, such as: Hermione, Harry, Ron, Cedric, Krum, Hagrid and Bagman.

your voice ears, yesuse said, bus betragring?" said **Bagman** you's soppome a?" There Cuntupily leoc kitch the Midingicidestly." "Sod numored to **Cedric** weires. Nide feal **Hagrid**.
